

SPECIAL REPORT

Winners of the Golden Mobile!

Photo: Rasmus Höglund

Infracontrol was awarded the prestigious Golden Mobile in the category “Internet of Things – Platform of the Year”. The prize was awarded by the annual Swedish Mobile Awards on January 28 in Stockholm.

Jury justification for the award: “Infracontrol – This is intelligent infrastructure, reborn – making everyday city life simpler and smarter for the many.” Today, more than 100 municipalities in Sweden and Portugal use Infracontrol Online to improve and assure the quality of their service to citizens, companies and visitors.

Per Andersson, Infracontrol Online Product Manager was at the gala to accept the prestigious prize:

“What a fabulous moment. We truly value this recognition of our important mission – to make cities smarter and in doing so make every day life easier for us all. We are very proud to accept this award. Every day we see the great benefits our cloud service brings and we hope this award will mean even more municipalities discover this simple means of improving service to their citizens.”

Spotlighting an important area

Johan Höglund, CEO, was delighted to win the prize and hopes it will help draw attention to our need to gain better control over society's infrastructure.

"This prize, just like the Growth Prize we were awarded in 2013, gives us a well-deserved pat on the back and the energy to continue with our mission. We strive to make society's infrastructure that little bit smarter, and I hope our winning the Golden Mobile puts this important field in the spotlight."

About Infracontrol Online

Today, more than 100 municipalities in Sweden and Portugal use Infracontrol Online to improve and assure the quality of their service to citizens, companies and visitors. Among other things, Infracontrol Online provides connected customers with:

- Fault reports and observations
- Collection of operational alarms from technical installations
- Distribution of fault reports and alarms to case handlers
- Supervision of remedial actions
- Distribution of alerts and advisories to citizens and companies
- Smarter control of e.g. public lighting
- Simple methods for reporting, follow-up and analysis

Furthermore, Infracontrol Online provides valuable knowledge about an infrastructure's performance and its maintenance requirements, which can then form the basis for planning and implementing various measures.

The cloud service was set up in 2003 and has run continually since. It's built on an open platform that provides excellent scalability and integration capabilities with other systems.

The Swedish Mobile Awards and the Golden Mobile in brief

The Swedish Mobile Awards are unique: they gather the most challenging, innovative and disruptive solutions and companies from the entire wireless industry.

The Swedish Mobile Awards have taken place since 2001.

They have since rewarded many of Sweden's greatest industry players, start-ups and technology exporters such as Skype, Soundcloud, TrueCaller and Zound Industries before their earliest claim to fame.

Here are some of this year's other winners:

Company of the year: www.izettle.com

Fintech of the year: www.getswish.se

Media Service of the year: www.omni.se

A proud, happy winner: Per Andersson, Product Manager.
